CURIOUS

Who Had Two Living Wives.

to One In The City of Chicago.

La Crosse, Wis., July 23.-An unusual segul to the exposure of the double life of Willard B. Frost, who died in a Chicago hospital on February 28, came today when the Chicago widow of Frost came here, met the La Cross widow and left with her and the latter's children for Chicago, the two women agreeing to make their home together for the remainder of their lives

In Chicago Frost had a wife, a son of 21 years and a daughter 18 years old. In La Cross, where he was known as Dr. Wilfred B. Montclair. he had a wife and two boys of three and two years. Until his death each family was in ignorance of the other's existence, and Frost, or Montclair, was considered a model husband and father, whose business took him away from home much of the time, Revelations of his double life prostrated both widows.

With their four children they have taken up their residence in Chicago.

"We will live together and teach W. Clark Made Defendant them to respect the memory of their father," said the Chicago Mrs. Frost. "It is our work. Wy both loved him and if he made a mistake it is our duty to rectify it.

Deafness Cannot Be Cured

Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear.
There is only one way to cure deafness, and that is by constitutional remedies.
Deafness is caused by an inflamed condition of the mucous lining of the Eustarhian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed.
Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

HOPKINSVILLE: KENTUURIAG, JULY 04

Virginia Park Almost Ready To Be Thrown Open To The Public.

J. R. GRESHAM, TO BE KEEPER

The Finishing Touches Are Being Put On The Work Under Way.

The Park Committee of the City Council met Tuesday night to make final arrangements for the opening of Virginia Park. The date will be August 8 at 8 p. m., if it suits the plans of the Lebkuecher Band, not now in the city. There will be a brief program of speeches, which has not been arranged yet.

The Committee agreed to employ James R. Gresham as park keeper, to begin service next Monday. His appointment is subject to the approval of the Council. His compensation was fixed at \$45 a month.

Three dozen more lawn seats were ordered, 6 dozen having already been received.

The big urns will be set with flowers and other details arranged next week. All of the contract work except plastering and plumbing and some painting is about finished on the pavilion. The tile roof will be put on later, as the material is not in the city:

MERITORIOUS PROGRAM

want done. Rather than have this Was Seen At The Rex Last Tuesday.

> One of the best balanced programs ever shown in our city was that of the REX on Tuesday.

The Bison feature told an unusually coherent story, with a clear plot and a natural conclusion.

The battle scenes and the scenes Mrs. W. B. Adkins and daughter, by the board before it acjourned in the open, the clarity and appeal of the story, made it easily the most son Company yet produced.

The comedies balanching the grim scenes of the havoc of war, were laughable and depended upon real humor for the laugh, not on the time worn expedients of the slapstick variety and sent away a pleased and smiling au ience.

The big three real Itala feature "The Palace of Flames" should prove a great drawing card for to-

The August Wide World Magazine.

Here's the Latest.

"The tango gown" has made its appearance in New York, coming from Paris. It is described by the importer as follows: "The tango gown means that instead of a slit skirt, a pair of small Turkish trousers, reaching to the ankles and held by a band of crystal beads, has been adopted for ultra-fashionable dancing frocks. Over these attentuated trousers there is a drapery of crepe of the same shade, entirely open, being held by a few stitches only, as far as the hip line. The figure is plainly visible above the knees. The new gown is called the last note in dress. The blouses and bodices are made loose and have the appearance of falling off. The upper part of the figure is not outlined in the least. Women don't care a fig how large their waists are, but seem anxious for gowns that makes ankles and calf visible. We may object, but it is the fashion, and Americans will have to get used to it."

The August Strand Magazine.

The August Strand is a special fiction number and contains a great many short and long stories written by leading novelists. Conan Doyle brings to a conclusion his thrilling story entitled "The Thrilling Belt," while Baroness Orezy continues her serial of Roman days "Unto Caesar." Contributors of short stories include Bertram Atkey, J. J. Bell, James Barr, Martin Swayne and Horace Annesley Vachell. Among the interesting articles may be mentioned, "Amusing Children I Have Met," written and illustrated by that famous delineator of child life, Hilda Cowham. Many other stories and articles make the August Strard particularly interesting.

Mrs. H. M. Gardner has returned from a visit to Cerulean.

THE THRICE-A-WEEK EDITION OF THE **NEW YORK WORLD**

Practically a Daily at the Ince of a Weekly.

No Other Newspaper in the World Gives So Much at So Low a Price.

This is a time of great events and you will want the news accurately and promptly. The Democrats, for the first time in sixteen years, wil have the Presidency and they wil have the Presidency and they will also control both branches of Corgress. The political news is sure to be of the most absorbing interest.

There is a great war in the Old World, and you may read of the extinction of the vast Turkish Empire In Europe, just as a few years ago you read how Spain lost her last foot of soil in America, after having ruled the empire of half the New World.

The World long since established a record for impartiality, and anybody can affords its Thrice-a-Week edition, which comes every other day in the week, except Sunday. It will be of particular value to you now. The Thrice-a-Week World al so abounds in other strong features, serial stories, humor, markets, cartoons; in fact, everything that is to be found in a first class daily.

THE THRICE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequaled newspaper and the Hopkinsville Kentuckian together for one year for \$2.65.

The regular subscription price of the two papers is \$3.00.

We are prepared to do all kinds of hi h-grade job printing. Try us.

MANY ALIENS COME ORIGIN OF

Record Point.

More Foreigners Admitted to Uncle Sam's Domain During This Year Than in Any of the Three Previous Years, Figures Show.

Washington. - Immigration to the United States has been heavier this year than during the three previous years, 747,998 immigrant aliens having been admitted to this country during the nine months from July, 1912, to and including March, in addition to which 140,901 non-immigrant aliens were admitted, making a total of 888,-

A total of 12,557 aliens were de barred for various causes. Emigrant aliens departing numbered 247,798 and non-emigrant aliens 198,065.

American citizens going abroad during the nine months numbered 242,-159; those returning 223,478. These departures and arrivals made the pastotal 1,124,934 arrivals and 688,022 de- an instrument made from the bone senger movement during that period partures.

More Japanese entered the country during the nine months than during the entire previous year, 6,435, compared with 6,172 while 591 returned to Japan, compared with 1,501 during 1912. Immigrants from the Russian empire predominated during the period, 176,252 persons from there having entered, compared with 162,395 in 1912. Italians were next with 150,383, compared with 157,234 in 1912.

By occupation the majority of immigrants were farm laborers, 172,639 having entered; other laborers were 133,214; servants, 90,832, and tailors, 16.648. One significant feature of the statistics is the fact that the number of laborers departing exceeded the number arriving. During the nine months 164,025 sailed and during the previous year 209,279, compared with 133,214 arrivals in the period and 135,-726 for 1912.

GOVERNMENT MUST PAY.

The commonwealth of New Hampshire the other day lodged a claim for 35 cents against the federal government of the United States, and the worst of it is the United States has to pay, notwithstanding that economy must be the watchword of the administration in the face of tariff revision.

Zealous state authorities in an unrelenting campaign against pests invaded the back yard of the postoffice building at Dover, N. H., and discovered three browntail moth nests in a lonely tree that sheds its shade upon the hard-working postal employes of Dover during their rest periods. The state "bugologists" without much ado destroyed the nests of the pernicious bugs and nonchalantly presented a bill for 35 cents, evidently at the established rate of 15 cents for the first nest and 10 cents for each of the others.

The postmaster protested vigorously, with the declaration that he himself could have annihilated the moths without expense if the state had pointed them out. An issue was threatened and the quarrel was referred to the treasury department.

Sherman Allen, assistant secretary of the treasury, who learned diplomacy as an assistant secretary to President Taft, conceded the point. After a formal bill and voucher was rendered a treasury warrant was sent to the state.

SHOWS BIG GAIN.

More than 150,000,000 parcel post packages were handled in the postal service during the first three months the new system was in operation, according to reports submitted to Postmaster General Burleson. These figures, which are based on the amount of business done at the 50 largest postoffices; show that approximately 62,-000.000 parcels were handled during the month of March or about 12,000, 000 more than were handled in February, when the total exceeded January by 10,000,000. Approximately, 55 per cent, more business was handled in March than in January.

As during the first two months, Chicago led all other cities in the number of parcels handled with a total of 6,895,744; New York city handled 5,973,075 and Boston 1,657,039. The most noticeable gain was made in Detroit by jumping from eighth place in January and ninth in February to fourth in March, with a total of 1,420,-000; following in order are Philadelphia with a total of 1,294,954; Cleveland, 1,209,000; St. Louis, 1,148,586; Brooklyn, 983,130; Jersey City, 868,-648, and Kansas City with 687,000.

CHINA'S FOREIGN TRADE.

China's total foreign trade for 1912 was approximately 900,000,000 taels. \$585,000,000 in United States money. This is an increase of \$33,-000,000 over 1911. The combination of the revolution in 1911 and bumper crops in 1912 was responsible for the However, the imports continued to be somewhat in excess of the exports.

America's participation in the trade with China in 1912 kept pace with previous years, except in cotton piece goods. In 1911 China took 16,000,000 pieces, but only 11,250,000 pieces in 1912. The American contribution of 2,500,000 pieces in 1911 was cut to 1,700,000 pieces last year. representing \$7,000,000 and \$4,500,000, reper

Tide of Immigration Reaches a Adjunct of Every-Day Life of Great Antiquity.

> In Crudest Form It Was Doubtless Natural Thorn-Machine Now Used to Make Them the Invention of a Massachusetts Man.

From the earliest times the pin has been an adjunct of every-day life. In ! its crudest form it was doubtless a natural thorn of the sort still used as a fastening by the peasant women of Upper Egypt. The name itself goes far toward indicating the origin, spina being, of course, the Latin for a thorn, while the spina christi is the great thorn tree. Centuries ago the Welsh used "pindraem," thorns scraped and dried, for fastening their clothing. while even today in England gypsies use the long, sharp shafts of the blackthorn for this purpose. The Red Indians and the central Asian tribes have the same habit.

After this primary form of pin came the bone pin of the prehistoric ageof some animal, split and then rubbed to a point. From this emerged the bronze pin of the bronze age, polished and finely tempered, and it was during the bronze period that the safety pin came into being. The first efforts in the latter direction were bow-shaped and awkward, but these soon fined down to a virtual replica of the pin seen today. There were also long stiletto pins with ribbed handles, many of which have been found in Egyptian deposits of 1400 B. C. and in Cyprus and Sparta. Needless to say, these could dargerous weapons in violent hands, apropos of which Herodotus tells a strange story of the disastrous ex pedition undertaken by the Atheniaus in the sixth century. One man alone returned to Athens, a fact which so enraged the wives of the slain that they set upon the unfortunate survivor and slew him with the stout pins which fastened their dresses. After this the ladies of Athens were officially debarred from the use c these dangerous stillettos.

Hairpins have been elaborated as means of decoration since the earlies: times. Particularly beautiful is the variety and delicacy of their worl manship, two of the finest specimen being the gold pins which were four at Salamis in Cyprus, and are now in the British museum. Even mor handsome were the Saxon pins of later date, with their shanks of bras head of gold and embellishment of garnets and pearls. These were, too the larger sort of pins so conspict ously and frequently mentioned in the Bible. The instrument driven by Jan' through the temple of Sistera wa probably a tent pin, while Delila with a pin or batten. In the middl ages pins were a great fashion-indeed, a necessity-in France, and w have it on record that in 1347 12,000 pins were removed from the roya wardrobe for one of the French prin

The convenience was probably a lit tle later in reaching England, but is 1540 we hear of Queen Catharine (Howard) importing pins from France. In 1560 the trade underwent considerable change, brass superseding iron while at the same time the price was lowered. During the reign of James I. the metal pin came into fashion. In 1817 a machine for producing entire pins was invented by an Amer can, Seth Hunt, but it remained for Samuel Wright of Massachusetts to patent in 1824 the wonderful pinmak ing machine which is generally used today.

Poor Girl.

"How long have you been married?" "It will be six months next Thursday?"

"And do you still regard your husband as the most wonderful man who ever was born?"

Then the poor girl broke down and sobbed piteously. When she could trust herself to speak again she said: "No. Charles has disappointed me terribly. I'm afraid I have wrecked my li-life. Last night when I asked him to get up and see if there wasn't a burglar in our room he bumped his nose against the edge of the open door and he said three simple awful swear words just as if they came natural to him."-San Francisco Star

Hunger Strike of Long Ago. As long ago as the reign of Edward III. the hunger strike was known in England. Cecilia, wife of John de Rygeway, was in 1357 confined in Nottingham jail on a charge of murdering her husband, and there, according to the old records, she abstained rom meat and drink for forty days. Which, being reported to the king, he was "moved by piety, and for the glory of God and the Blessed Virgin to grant the woman a pardon." The records say nothing of her guilt or innocence, nor do they throw any light on fourteenth century ideas of

forcible feeding. Young Entomologist. Saturday afternoon when I was fixing the screens for windows and doors in our house, my son Robert, three and one-half years old, was an interested and very inquisitive spectator Among other things he asked: "Why do you put the screen door on, pa?" "Well," I answered, "so the flies won't eat you up." He pondered a second upon this, and then suddenly burst out: "The flies can't eat me up; they got only little mouth-es."-Exchange.

The Love Letters of a Confederate General

WE begin in the November issue a series of real love-letters written over fifty years ago by one of our national heroes to his sweetheart during the period of '61 to '65. This great general will go down to posterity as having accomplished one of the most brilliant feats of arms in the history of the world. He was as great a lover as he was a general, therefore these letters combine authentic history and exquisite romance. They sound a human note that no other work of

literature has done in a decade; it is war, it is romance, it is history, it is literature. You simply can't afford to miss this wonderful series-an inside story of the Civil War now published for the first time and containing all the freshness of a contemporary happening. These letters will grip you hard, and hold your interest from first to last. Fill out the coupon and send it

BILLIONS OF EGGS COLLECTED

The annually increasing value of the work of the United States bureau recommend Cardui, the woman's of fisheries is shown by the fact that in the first eight months of the present fiscal year the number of eggs col. remedy. Fer five years I was unable lected for planting exceeds by 834, to do my own work. Half my time 000,000 the number gathered in the was spent in bed. At last I tried same period last year. The number so far this year reaches the gigantic total of 2,185,000,000, against 1,351,-000,000 in 1912.

The greatest gain has been in white- other womanly miseries when your fish eggs from the great lakes, where own druggist has on his shelf a this year's take has been 524,000,000. an increase of 380,000,000. In lake trout the increase has been from 59, Get a bottle for your shelf. As a 000,000 to 69,000,000.

In the New England coast this ing has been found for 50 years that year's gathering of pollock eggs has been 867,000,000. At Gloucester, Mass., help you. last year's haddock egg collection totaled 160,000,000 and this year's will Advertisement. exceed that by many millions. All the haddock eggs are taken from fish caught for market, so that eggs that would otherwise be sold and eaten are saved for further propagation.

Dog salmon egg collection shows the largest gain on the Pacific coast, this year's take having been 20,000,-000, against 3,300,000 last year.

MONEY ALMOST GERM PROOF.

Those who have hesitated to amass wealth because of the warning to "beware the billions of bacteria that lurk in every gill" need hesitate no longer, according to Dr. W. C. Rucker, assistant surgeon general of the public health service. He declared the other day that tests and examination of currency, both washed and unwashed bills, showed them to be singularly free from germs. He attributed this to the ink used in printing the bills, which he said had proved to be an almost perfect germicide.

"The public health service was called upon to examine the soiled money returned to the treasury," said Dr. Rucker, "after it had traveled around the country and had passed through the hands of thousands of persons. To our surprise it was found to be singularly free from bacteria, and the ink used in the bills is given the

The ingredients used in the government's ink are not made public, the recipe for the manufacture of the ink for the bureau of engraving and printing being zealously guarded.

PRICES CUT DOWN.

Prices received by producers in the United States for staple crops increased 2.3 per cent. from April 1 to May 1, according to a report by the department of agriculture. The increase for the same period a year ago was 8.4 and the average increase during April for the last five years was 3.4. On May 1 prices of staple crops averaged about 30.1 per cent. lower than on May 1, 1912, according to the department.

The average prices for meat animals increased 3.7 per cent. from March 15 to April 15, as compared with an increase of 10.7 per cent. for prices of meat animals averaged 16.7 per cent, higher than on April 15, 1912. On April 15, 1911, the prices for meat animals were 26.6 per cent. lower than they were on April 15 this year.

VAST "COOKBOOK" ISSUE.

More than 12,000,000 copies of the various "cookbooks" prepared by the Mayapple, 32; pink root, 12c and 13c department of agriculture, the latest of which is one on how to serve mutton in a number of delectable forms, have been issued since this line of government activity began. By far the largest number published was of 18c. a bulletin on the "Economic Use of Meat in the Home," which ran up to the enormous total of 2,235,000. Congress steelf printed 500,000 copies in addition to those distributed by the 22c to 35c, new. department.

Of the bread-making pamphlet, nearly 500,000 have been distributed. and of the cheese leaflet almost 300,-000 have been sent out. Of the mutton bulletin, just out, 50,000 copies have been ordered printed for initial distribution.

Six-Mile Depth Near Philippines. A surveying ship of the German

navy has recently discovered the deepest known spot in the ocean. It is near the Philippines, about forty sea miles off the north coast of Min-

Great depths were found to be numerous in this region, but the record sounding showed the amazing result of 9,780 meters, or 406 feet more than six miles.

The greatest ocean depth hitherto known was found by the United States cable steamer Nero in 1901. This spot was to the south of the Island of Guam, and the deep sea lead indicated 9,635 meters—just a little less than six miles.

Finds Moonlight Calls Forth Germs. Strange powers always have been assigned to the moon, and it is not surprising to learn that a South African belief is that moonlight hastens

the decomposition of fish. But it is surprising to find this belief brought forward as more than a superstition. D. E. Hutchins says he nas obtained experimental proof of this action of the moon, and suggested that it is due to some low form of life called forth or stimulated to action by

Solemn Speculation.

"So you think that new turtle cure will be expensive?" said one doctor. "Well," replied the other, "it may Grape Bags for sale at this depend on whether it employs ordinary mud turtle or terrapin."

NEW BRANCH OF EDUCATION.

"The municipal university is comparatively new in this country, and its development will be watched with interest," said Dr. P. P. Claxton, United ; States commissioner of education the other day, in discussing the University of Cincinnati. "There are certall significant things about this city university that tend to show how valuable such an institution may be to a ommunity. Consider the student body. Something like 22 per cent. of the students are fatherless. Of the fathers of the others, less than onefourth are in the so-called professions. Over three-fourths are in nonprofessional, commercial or mechanical pursuits. As a further indication of the class reached by the university, 85.5 per cent, of the male students have followed gainful occupations before coming to college, and 74 per cent. of them work regularly for a part of the time during the year.

"Although the municipal university may be more or less of a novelty in this country, it is by no means so rare abroad. Any one who has studied at Leipsic knows that the university in that city is not merely a great German university, but is first and foremost the University of Leipsic-a municipal institution."

SMITH WAS PERPLEXED.

Postmaster General Burleson had a caller the other day, and when the caller and transacted his business Mr. Burleson was minus just \$5. The man had been hanging around the postmaster general's outer office some time. He explained to Ed Smith, confidential clerk of the postmaster general, that he was a lawyer, had been to see Secretary of War Garrison and wanted just a minute with the postmaster general. Smith explained that his chief was very busy, but he managed to get the visitor in to see him late in the afternoon. As the latter emerged from the posmaster general's presence Smith was called in.

"Look here, Smith," said the postmaster general, "don't you know that you let a book agent in to see me?" Smith was perplexed.

"But never mind," continued Mr Burleson. "He had a book for sale for which I have been looking for the last three years and I bought one from

GREAT INFLUX OF IMMIGRANTS.

The influx of immigrants into the United States for the fiscal year ended June 30, 1913, will probably be greater than that for any other year in the history of the country. Judging from the reports now being received by the commissioner general of immigration, the arrival of aliens in this country by the end of June will pass the high water mark of 1907, when approximately 1,200,000 immigrants landed on the shores of America.

Statistics received by Commissioner General Keefe show that for the first nine months of the present fiscal year, which ended March 31, 1913, a total of 888.899 immigrants arrived in this country at all ports of entry. If this ratio should keep up, it is estimated that at least 420,000 additional will arrive during the last three months of the year, which will bring the grand total up to 1,308,899, the highest mark ever reached, according to the records at the immigration bureau.

EXPERIENCE ONLY WAY.

More than 40 per cent. of all the farmers interviewed by government representatives believe that experience is the only way to learn how to farm. This percentage told agents recently sent out by the department of agriculture that they took no stock in farmers' institutes, demonstration agents, farm papers or department of agriculture publications as aids in helping to make the soil more pro-

Starting on motorcycles or on foot four department agents have traveled through 13 states, visiti ng every farmer along the way and asking questions. This inquiry revealed the fact that of the farmers who got department of agriculture bulletins, 84 per cent. read them, and 48 per cent. followed the suggestions contained therein. Of those who attended farmers' institutes it was learned that 54 per cent. practiced the methods advocated there.

COLLECTION OF RARE BIRDS.

A collection of more than 2.000 rare birds has been presented to the Smithsonian institution as the result of an expedition through Africa by Maj. Edgar Mearns, U. S. A., retired, of the army medical corps. The birds are now being classified and cataloged. Major Mearns accompanied Colonel Roosevelt on his famous African tour, and he was asked to make a second trip with an expedition fitted out by Childs Frick, son of the steel magnate. He also represented the Smithsonian institution on this expedition.

Hot Sun No Aid to Crops. Farmers will be interested to learn, on the authority of a French scientist, that just as good harvests can be expected after a duil summer as after a

long spell of sunshine. He says that the value of the burning orb's rays in helping crops is greatly overestimated. Observations show that crops were just as good after the summers of 1910 and 1912, when the skies generally were overcast, as after the universally sunny

summer of 1911. The reason for this, he says, is that only a moderate quantity of light is necessary to assimilate the carbonic gas in the air.

Hooks For The Old Men.

A young lady who appears to have been devoting some thought to the subject of matrimony writes to the Kansas City Star, setting forth her conclusions as follows:

Than to marry an old man

With his hat all lined with silk. The old man comes hobbling in Quite weary of his life.

The young man comes skipping in-"Come kiss me! My dear wife."

Go 'was -old man-go 'was!

You must first round up your young

And only a foolish old man Would line his hat with silk.

The young man's shout may cease

"Come kiss me! My dear wife."

But how old must an old man be

Changing Hues. "You are in love with a blonde," remarked the fortune teller, "but after you marry her, beware of a brunette "No danger," remarked the patron; "it's the same woman."—The Ladies' World.
